

Join RSVP's Roots for STEM

◆ **Volunteers Needed to Engage Children in Math & Science**

The “Roots for STEM” program utilizes highly skilled volunteers 55+ to engage young children in hands-on / child-centered math & science activities that build skills & knowledge, but most importantly stir interest and excitement for future STEM learning.

◆ **How It Works**

Volunteers are matched with local schools or afterschool programs. The volunteers visit the children on a regular basis to engage children in math & science related activities.

Volunteers will be provided with training on child development and state core standards and given sample activities, tips, and ideas to get started.

Join RSVP's Roots for STEM

◆ **Help a Child Reach His or Her Full Potential!**

Open a child's mind to the wonder and exploration of the world around them!

By offering a small amount of your time, you can help children in your community develop a love of STEM subjects like math & science that can last them a lifetime!
