Zooming for a Cause
A Conversation About Engaging Older Adults with Virtual Volunteering

Jennifer Crittenden, PhD, MSW
Eve Flippen, MS

This material is based upon work funded by the Office of Research and Evaluation at AmeriCorps under Grant No. 22RE249044 through the National Service and Civic Engagement research grant competition. Opinions or points of view expressed in this document are those of the authors and do not necessarily reflect the official position of, or a position that is endorsed by, AmeriCorps.

How would you describe your experience with virtual volunteering strategies?

- Basic awareness/Haven't used it yet
- Beginner/Used it some but not much
- Intermediate/A little more experience
- Expert/Lots of experience

Background

- There are positive health and well-being outcomes experienced by older adults who volunteer.

- The COVID-19 pandemic increased health and isolation risks & significantly impacted traditional on-site volunteering.

- Little is know about the position of virtual volunteerism in a post-pandemic world.
Defining Virtual Volunteering

Volunteer work that is undertaken using internet-based technologies.

Virtual volunteering includes activities and job assignments that can be conducted completely off-site or can be used part of the time to supplement on-site and face-to-face volunteering.
PURE VIRTUAL VOLUNTEERING
Volunteer positions built to be online
Cannot be done in-person, or were not built to be done in-person

THE PIVOT
Traditional in-person volunteer work that moves to virtual. Many health and wellness programs pivoted to adapt to COVID.

HYBRID VOLUNTEERING
Volunteer positions that blend virtual and in-person work - possibly for training, special events, or due to the variety of work.

VIRTUAL MANAGEMENT
Using technology - such as web portals or smartphone apps - to manage a large number of volunteers. This is popular in ecology volunteering and emergency disaster response.

REMOTE VOLUNTEERING
Volunteering off-site without a digital platform. Think letter writing campaigns or friendly phone call programs.
What we know about Virtual Volunteering

https://www.inc.com/jason-aten/why-your-virtual-meetings-are-so-bad-how-to-make-them-better.html
Older Adults & Tech
Pre-Covid & During Covid

In a 2021 study, online social engagement was the most promising way to mitigate the mental health effects of social isolation among older adults.

73% of older adults surveyed adopted new technology since the beginning of the pandemic.

Adults 65+ using the internet in 2019.
Virtual Volunteering

On the rise since the Covid-19 Pandemic

Great for volunteers with limited time, disability, and/or home-based obligations

Geographically inclusive

A strategic tool for enhancing volunteer experiences and building program capacity
Research Aim

• To examine the use of VV among older adult volunteers

• Describe the benefits, opportunities, and challenges of VV from both volunteer and host program/site perspectives
Programmatic Perspective Questions

● How and to what extent are volunteer sites engaged in virtual volunteerism?
● What are the types of job assignments and host sites that lend themselves to virtual volunteering?
● What are the challenges at the host site level in developing and deploying virtual volunteering?
Volunteer Perspective Questions:

- What are the challenges and opportunities of virtual volunteer assignments?
- What are the benefits of virtual volunteering from the volunteer perspective?
- What is the participation gap between those volunteers who desire virtual volunteering and those who are able to access those opportunities?
Project Description
Year One: Environmental Scan

Environmental scan of virtual volunteer (VV) practices and other practices that increase accessibility in the volunteer sector (Literature Review)

Secondary data analysis of job postings via VolunteerMatch (3,000+ Listings)
Year One: Semi-Structured Interviews

RSVP program directors

Thought leaders in volunteerism

Thought leaders in technology
Year One RSVP Interview Recruitment Process

AmeriCorps generates list of sites using virtual volunteering currently (based on work plan)

Research team will recruit sites in each ACS geographic region

ACS staff list generated by research team prior to outreach.
Year One Volunteer Station Surveys

Survey of The Retired and Senior Volunteer Program (RSVP) program station staff

- Scope the use of virtual volunteering within RSVP
- Identify site-level opportunities and challenges
Year One RSVP Survey Recruitment Process

 Invite issued via ACS grantee sites

 Online survey invitation and link provided
Timeline

1. **January 2022**
   - IRB approval for key informant interviews with RSVP program directors and thought leaders

2. **March-June 2023**
   - Conduct outreach to potential interviewees with assistance from AmeriCorps national and regional staff; invite selected RSVP grantees/directors that currently use VV for interviews

3. **April-June 2023**
   - Use interview and literature review data to develop and pilot station survey

4. **June-August 2023**
   - Distribute survey to RSVP stations

5. **August-September**
   - Data analysis & reporting
Years Two and Three

Expand interviewing and survey work into SCP and FGP
Anticipated Research Deliverables

- A compendium of volunteer placement opportunities best positioned to be configured virtually
- Recommendations that programs can put into place to increase access to virtual volunteer opportunities across digital disparities
- Technical reports and manuscripts detailing findings
Questions?
What are we learning?
Benefits

For Organizations:
- Reduce the risk of Covid-19
- Access a new cohort of volunteers
- Reach rural areas
- Create “off hours” opportunities
- Expand programming

For Volunteers:
- Learn new tech skills
- Mentor others in tech
- Stay connected while traveling
- No commuting!
  - Save time
  - Not weather-dependent
“So being able to continue your volunteer work to know that you could go and stay all summer with the grandkids, help out your own children, and things like that but still do volunteering, and keep some of your regular routine…That is something that people really enjoy.”
“...when we work with our young adults and adults returning back to citizenship...they are more likely to accept being virtual because they are hustling. They're trying to find a job and go to interviews and stuff like that. So if there is an opportunity to have flexible meeting times...they have this timeframe to meet with you”
“If on our webinars we leave 5 min at the top, there's full blown conversations. They are a community themselves and they’re states apart. People who never would have interacted otherwise, really coming together, so that social aspect, it's still there as well.”
Challenges

For Organizations:
- Capacity – funds, staff, partnerships
- Having to forge their own path
- Not all volunteer tasks can move online
- Different roles = different challenges

For Volunteers:
- Tech literacy & access vary for volunteers & beneficiaries
- Cost of tech & internet
- Attitudes & hesitancy
- Privacy & security concerns
- Virtual fatigue
“But does home have Internet access? Does home have computers? Everybody's got a cell phone. And now facetime kind of thing. But you know how's that working?”
“...There's a wide scope of understanding in terms of tech savviness and people self-identify. ‘Oh, sure I can...do remote-friendly visiting, and you come to find out that...there's some...skills that are lacking.”
Opportunities

For Organizations:
- "Push through hesitation" with VV
- Opportunity to be more intentional post-pandemic
- VV viewed as an ongoing strategy, part of a hybrid volunteer workforce model

For Volunteers:
- Potential for transferability of skills across domains
  - i.e. Use of tech skills to access healthcare; socialize
“Because we have figured out so many ways and places that online education has been useful to our network, it’s [virtual volunteering] never going to go completely away...I can decide one week to stay in my pajamas and the next week to come be with my friends.”
“The pandemic eroded any remaining resistance that many staff members had saying, ‘Well, how can a volunteer get work done if they are not in the cubby next to me?’ Well, now you're working from your dining room table and you're getting stuff done so you can trust volunteers to do the same so I feel like the pandemic eroded that.”
Discussion Q’s

1) In what ways are you using virtual volunteering (VV) in your program?
   - Does VV look different now versus at the height of the pandemic?

2) Why do you offer VV opportunities?

3) What challenges have we not discussed yet? OR Is there a challenge mentioned that you want to echo?

4) What is one question you have about VV that you’d like to pose to others?

5) What advice do you have for those who want to develop/maintain a VV program?
